

Mazak expands European Parts Center

Yamazaki Mazak has more than doubled the capacity of its parts operations with the opening of its expanded European Parts Center.

Located in Leuven, Belgium, the Parts Center has increased its warehouse capacity from 2,700 m² to 4,600m² and is capable of shipping 97% of Mazak parts on the same day. The new facility has the capacity to ship over 20,000 parts per month with orders being processed 365 days a year.

At the heart of the parts operation is the expanded warehouse, which will hold €37 million of parts in stock and 35,000 parts numbers for machines across the Mazak range, including those that are no longer in production, even for machines older than 30 years of age. In the future, the warehouse will be further expanded which will double the number of parts numbers in stock and increase warehouse capacity to 5,528m².

The state-of-the-art warehouse is fully automated and equipped with a new “mini-load” system for small parts picking from 8,000 small trays, travelling from 70,000 locations within the warehouse, and a stacker crane system for 3,000 medium to large pallets. In addition, the new 1,000m² logistical working area will house an automated conveyor belt system and four intelligent work stations. There will also be increased ground floor storage capacity for very large parts.

The entire facility is integrated into the Mazak network with a high-end parts ordering system which facilitates online ordering from each Mazak office, together with real-time stock visibility for dealers and linked website tracking for shipment status checking.

European Parts Center

Opening ceremony
